PLANE PROBLEMS IN ELEMENTARY GEOMETRY, OR, PROBLEMS ON THE ELEMENTARY CONIC SECTIONS WITH AN INTRODUCTION

DOWNLOAD

To read **Plane problems in elementary geometry, or, Problems on the elementary conic sections with an introduction** PDF, please click the hyperlink listed below and save the document or have access to additional information that are relevant to PLANE PROBLEMS IN ELEMENTARY GEOMETRY, OR, PROBLEMS ON THE ELEMENTARY CONIC SECTIONS WITH AN INTRODUCTION book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 38 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1873 Excerpt: . . . to be tangent to another line at a given point, three determining points are virtually given by which to construct it. Or, if the radius is given, the outer extremities of any three positions of this radius will be three points, through which the circle can be drawn. 83. From these principles follow the tables below, which include the fundamental problems already given. The problems of a straight line through two explicit points, and of a circle through three such points, are omitted, as they are not problems of tangency. a. -- Tangent Straight Lines. Prob. 52. To draw a Tangent at a given point, on a circle whose centre is known. The solution here given is a useful application of Prob. 43. Thus (Fig. 21): 1st. Lay off the radius AC, each way from A, and on the circumference. 2d. Through C, and the points p and q thus found, draw indefinite lines, not shown. 3d. From p and q as centres, and radius, AC, of the given circle, draw arcs, and note their intersections with the lines just described. 4th. Join the points thus found, by a straight line, and it will be the required tangent at A. Principles. -- These will be perfectly obvious on making the construction. Prob. 53. To draw a Tangent at a given point, on a circle whose centre is not known. Let abc, Fig. 48, be the circle, and T the given point. Take any arc, Trt, on one side...
